Volume 195 1988

Contents

Letters to the Editor

More isotropic oblate rotators in elliptical galaxies
Nieto, J.-L., Capaccioli, M., Held, E.V. L1

Minor-axis rotation and triaxiality in elliptical galaxies
Wagner, S.J., Bender, R., Möllenhoff, C. L5

Water vapor stimulated synchrotron maser in the nuclei of galaxies
Crusius, A., Schlickeiser, R. L9

The white dwarf masses in cataclysmic variables
Hameury, J.M., King, A.R., Lasota, J.P. L12

EXO 033319-2554.2: a 55-MG eclipsing AM Herculis binary
Beuermann, K., Thomas, H.-C., Schwope, A. L15

Extragalactic astronomy

Percolation and synchrotron emission. II. Galaxy distribution
Zaninetti, L. 1

Radio continuum emission in nearby non-cluster spirals
Giuricin, G., Mardirossian, F., Mezzetti, M. 9

A new supergiant H II region in galaxy HS 1227+4758
Hagen, H.-J., Groote, D., Engels, D., Toussaint, F., Reimers, D. 15

(RN) The WSRT 1.4 GHz amalgamated source counts
Katgert, P., Oort, M.J.A., Windhorst, R.A. 21

(RN) Comments on the precessing binary model of the BL Lac object OJ 287
Corso, G.J., Ringwald, F.A., Harris, R.W. 25

A model of spiral-galaxy evolution. I. Galaxy morphology and star formation rate
Ferrini, F., Galli, D. 27

Radio properties and extinction of the H II regions in M 51
van der Hulst, J.M., Kennicutt, R.C., Crane, P.C., Rots, A.H. 38

The optical and UV spectrum of the Seyfert type 2 galaxy NGC 3393
Diaz, A.I., Prieto, M.A., Wamsteker, W. 53

A two-component model for the 40–120 μm emission from normal disk galaxies
Buat, V., Deharveng, J.M. 60

Multiwavelength study of the OH megamaser galaxy IRAS 1510+0724
Martin, J.M., Bottinelli, L., Dennefeld, M., Gouguenheim, L., Handa, T., Le Squeren, A.M., Nakai, N., Sofue, Y. 71

Population synthesis in galactic nuclei using a library of star clusters
Bica, E. 76

Galactic structure and dynamics

A ^{13}CO survey of the galactic plane from $l=38°$ to $l=67.5°$: molecular clouds and spiral arms
Jacq, T., Despois, D., Baudry, A. 93

Global spiral modes in stellar disks containing gas
Bertin, G., Romeo, A.B. 105

Formation, structure and evolution of stars

A 23 h EXOSAT observation of the X-ray pulsar 1E2259+586 and the associated supernova remnant G 109.1–1.0
Hanson, C.G., Dennerl, K., Coe, M.J., Davis, S.R. 114

Periodicities in gamma-ray burst light curves
Schaefer, B.E., Desai, U.D. 123

Duplicity in the solar neighbourhood. III. New spectroscopic elements for nine solar-type binary stars
Duquennoy, A., Mayor, M. 129

The binary orbit of the Be star HDE 245770=V 725 Tauri and the recurrent X-ray activity of A 0535+26
Margoni, R., Ciatti, F., Mammano, A., Vittone, A. 148

Co-ordinated VLA and EXOSAT observations of the flare stars UV Ceti, EQ Pegasi, YZ Canis Minoris, and AD Leonis
Kundu, M.R., Pallavicini, R., White, S.M., Jackson, P.D. 159

VBLUW-photometry of the two F0 Ib supergiants HD 80404 and HD 90853, and the K 5 Ib supergiant HD 85891 with its associated cluster
van der Wal, S.E., van Genderen, A.M. 172

(RN) Short-timescale light variations of the Wolf-Rayet stars WR 46 and WR 86
Monderen, P., De Loore, C.W.H., van der Hucht, K.A., van Genderen, A.M. 179

Grain growth in turbulent protoplanetary accretion disks
Mizuno, H., Markiewicz, W.J., Völk, H.J. 183

Twin beams from a young B star?
Heaton, B.D., Little, L.T. 193

Stellar atmospheres

Molecular line spectra from circumstellar envelopes. I. Excitation of ^{12}CO, ^{13}CO and CS, and the formation of line profiles
Schönberg, K. 198

The helium abundance in the double cluster h and χ Persei
Lennon, D.J., Brown, P.J.F., Dufton, P.L. 208

The variation of photospheric active regions in HD 127535
Mekkaden, M.V., Geyer, E.H. 214

The dynamical state of the atmosphere of the supergiant Alpha Cygni (A2 Ia)
Boer, B., de Jager, C., Nieuwenhuijzen, H. 218

High resolution spectroscopy of metal-deficient dwarfs: sulphur-to-iron ratio
François, P. 226

Diffuse matter in space (including HII regions and planetary nebulae)

The SMC compact blob N81: a detailed multi-wavelength investigation
Heydari-Malayeri, M., Le Bertre, T., Magain, P. 230

Steady-state chemical model of the molecular cloud towards the star HD 29647
Nercessian, E., Benayoun, J.J., Viala, Y.P. 245

CCH $N=4$–3 emission from dense interstellar clouds
Watt, G.D., White, G.J., Millar, T.J., van Ardenne, A. 257

Unexpected bi-polar motions in the planetary nebula NGC 1535
Clayton, C.A. 263

Cometary globules in the Gum nebula. I. Infrared and optical properties of CG 22
Sahu, M., Pottasch, S.R., Sahu, K.C., Wesselius, P.R., Desai, J.N. 269

Methanol in dark clouds
Friberg, P., Madden, S.C., Hjalmarson, Å., Irvine, W.M. 281

The Sun

High resolution microwave and X-ray observations of solar flares
Alissandrakis, C.E., Schadee, A., Kundu, M.R. 290

Dynamics of sub-relativistic electron beams in magnetic traps: A model for solar N-bursts
Hillaris, A., Alissandrakis, C.E., Vlahos, L. 301

Spectroscopy of the solar photosphere with high spatial resolution
Wiehr, E., Kneer, F. 310

Photometry of sunspot penumbrae
Collados, M., del Toro Iniesta, J.C., Vázquez, M. 315

The solar system

Results of close encounters between Pluto and Neptune
Olsson-Steel, D.I. 327

An investigation into periodicities in the morphology of CN jets in comet P/Halley
Hoban, S., Samarasinha, N.H., A'Hearn, M.F., Klinglesmith , D.A. 331

A radar orbit search for meteors from comet Lexell
Olsson-Steel, D.I. 338

Celestial mechanics and astrometry

Gravitational breaking of meteor streams in resonance with Jupiter
Scholl, H., Froeschlé, C. 345

Instruments, data processing, and computational methods

Double Fourier spatio-spectral interferometry: combining high spectral and high spatial resolution in the near infrared
Mariotti, J.-M., Ridgway, S.T. 350

Thermal control of the IRAM 30-m millimeter radio telescope
Baars, J.W.M., Greve, A., Hooghoudt, B.G., Penalver, J. 364

A low frequency radio array for space
Weiler, K.W., Dennison, B.K., Johnston, K.J., Simon, R.S., Erickson, W.C., Kaiser, M.L., Cane, H.V., Desch, M.D., Hammarstrom, L.M. 372

Abstracts of articles which have been published in A. & A. Suppl. Ser. 73, No. 1

3-Color surface photometry of a selected sample of early-type galaxies. I. Observations and data reduction
Vigroux, L., Souviron, J., Lachièze-Rey, M., Vader, J.P. 380

B and *V* photometry of faint stars in the Large Magellanic Cloud
Linde, P., Ardeberg, A., Lindgren, H., Lyngå, G. 380

A wide latitude CO survey of the third galactic quadrant
May, J., Murphy, D.C., Thaddeus, P. 380

UBV photometry in two fields in anticentre direction
Mohan, V., Bijaoui, A., Crézé, M., Robin, A.C. 381

A deep 92 cm survey of the Lynx area
Oort, M.J.A., Steemers, W.J.G., Windhorst, R.A. 381

The luminosity function of a sample of cluster galaxies
Olowin, R., De Souza, R.E., Chincarini, G. 381

Deep photometry of globular clusters. XI. Palomar 12: the youngest galactic globular cluster?
Gratton, R.G., Ortolani, S. 382

WSRT observations at 327 MHz of the cluster A262
Righetti, G., Giovannini, G., Feretti, L. 382

Classification of Mira variables based on visual light curve shape
Vardya, M.S. 382
